# Find the product. Build the supply route.

**Asian sourcing, product supply, import/export and OEM coordination**

Based in Osaka, EIKO is a specialist trading company drawing on networks across China, South Korea, Malaysia and other Asian markets. We support sourcing and trade for chemicals, functional materials, films, electronic components, precision parts and consumer goods, tailored to each project.

## You can ask us to source a product - even at an early stage

- **No manufacturer or product name? Start with what you know.**
- **Drawings, samples and searches for alternatives to existing products**
- **Supplier research, negotiations, samples and quality/specification review**
- **Import/export, delivery in Japan and ongoing sourcing as required**

## Core business: chemicals and functional materials

| | |
|---|---|
| **Coatings and film materials** | Release agents, adhesives, antistatic and gas-barrier materials; functional/PET films; release paper and films, including non-silicone options |
| **Resins and foam materials** | Polyester, polyurethane, acrylic and melamine resins; crosslinkers; silane-modified polyethers; silicone foam; thermal and sealing materials |
| **Basic chemicals and additives** | Monomers, polyols, solvents, tin catalysts and polyurethane flame retardants/catalysts. Conditions are reviewed against SDS, application, packing, quantity and countries involved. |

## Products by application and sourcing need

### Window and glass privacy films

Review application, glass type, dimensions, pattern and visibility.

### Decorative films for furniture and interiors

Woodgrain and other finishes, selected for substrate and processing needs.

### Precision metal parts, shafts and pins

Machining, sheet metal and molds. Review materials, tolerances, finish and quantity.

### Electronic components and wire harnesses

FFC, connectors, LEDs and sensors. Start with the application and specifications.

### Printing rollers and industrial equipment

Candidates are reviewed against specifications, installation conditions and destination.

### Consumer goods and OEM

Household, store and promotional goods. Discuss ready-made sourcing, specification changes and OEM.

## From initial inquiry to delivery

| | | |
|---|---|---|
| 01 | **Inquiry and research** | Application, quantity, timing and supplier options |
| 02 | **Proposal and quotation** | Price, MOQ, lead time and commercial terms |
| 03 | **Samples and specifications** | Evaluation, prototypes and inspection conditions as needed |
| 04 | **Order, trade and delivery** | Supplier coordination, documentation and logistics |

Services include global sourcing and trade support, OEM/contract manufacturing coordination, and consultation on chemicals and dangerous goods. Japanese-Chinese communication supports specification review and supplier negotiations within sourcing and trade projects.
